E.C. Manufacturing opening facility in Shawnee *Advanced manufacturing startup will create more than 250 jobs in Kansas*

The Kansas Department of Commerce announced today that E.C. Manufacturing, an advanced manufacturing startup, will open its operations in Shawnee.

“It’s always exciting to see new businesses open their doors, and it’s even more exciting when they choose to do so in Kansas,” said Kansas Commerce Secretary Pat George. “E.C. Manufacturing will create a lot of new jobs in the state, helping the continued growth of the Kansas economy.”

E.C. Manufacturing will open its manufacturing facility and headquarters at 23501 W. 84 Street. There, the company is expected to create 252 new jobs over the next three years and make an estimated capital investment of more than \$6 million. The company will produce advanced, small electrical components.

E.C. Manufacturing is affiliated with Heatron, a Leavenworth based company specializing in thermal management and heating element design and solutions, as well as LED Integration.

“Shawnee is pleased to welcome E.C. Manufacturing to our business community,” said Mayor Jeff Meyers. “Shawnee continues to exhibit the business environment, skilled workforce, and quality public infrastructure and resources that enable advanced manufacturing companies to thrive.”

“It’s great to begin the year with a significant number of advanced manufacturing jobs completely new to our region, as well as seeing those jobs here and not overseas,” said Bob Marcusse, president and CEO, Kansas City Area Development Council. “We congratulate E.C Manufacturing, the city of Shawnee and the state of Kansas on this good news.”
